Office of Platt & Brother,

Refiners, Assayers, and Dealers in Bullion and Specie,

No. 4 Liberty Place,

New-York, March 1st 1860

— Booth Esq
Assayer
Dr Sir

We understand from Mes Bailey & Co, that you have made an Assay of our fine Silver for them and report it to be 995.5 fine
We call our Silver pure and from any test that we are capable of making we can scarcely find a trace of alloy in it and we are particular to test each lot we get out,
What we wish is that you would please give us a statement of the analysis that you made and what the 4.5 alloy consists of, and oblige

Yours Truly
Platt & Bro
Jr Cashier
